

Two cohorts, two substitution failures

Expanded issue #4420 — multi-node metric evaluation
record → labels → comments(limit=100)

Earlier artifact: #6602

recur + replay → ship
45/45 calibration replays
4 requests → 1
tool contract 18/18

Answer miss: #6602

expected: Markdown link
compiled: link text only
tool contract = pass
answer contract = fail

Expanded compiler: stop where provenance ends

full candidate: RETIRE
comments.limit: ungroundable
no consistent expression
emit record → labels
comments + render stay with agent

92/92 · $U=0.0498 \leq \alpha=0.05$

Earlier continuation check

detects evidence mismatch
render check: 18/18 pass
provider-free mechanism check;
not live safety evidence
